Latest Article Reviews - CLIMATE

The screenshot shows a CNN Weather article titled "Rain fell at the normally snowy summit the first time on record" by Rachel Ramirez, CNN, updated on August 19, 2021. The article features a photograph of a snowy mountain landscape. A ScienceFeedback annotation is overlaid on the right side of the article, showing a "Scientific Credibility" score of +1.3, which is categorized as "High". The annotation also includes a "Public" rating and a "Show all (1)" button.

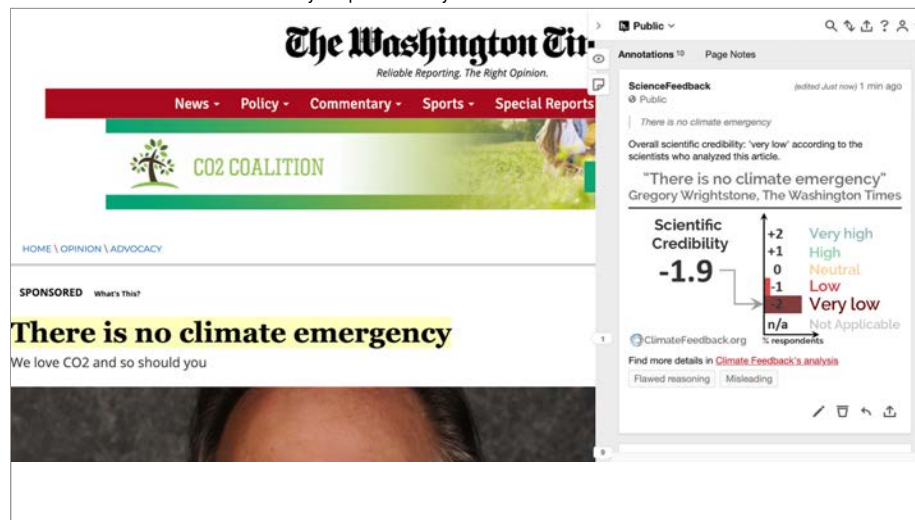

Rain fell on Greenland summit for the first time on record, as accurately reported by CNN

CNN

"The article is highly factual. One issue that we have is the lack of data over the Greenland Ice Sheet (both spatially and temporally). Thus some of the claims, although backed by..

CO₂ coalition sponsored article in The Washington Times presents list of false and misleading statements about the impacts of CO₂ and climate change

The Washington Times

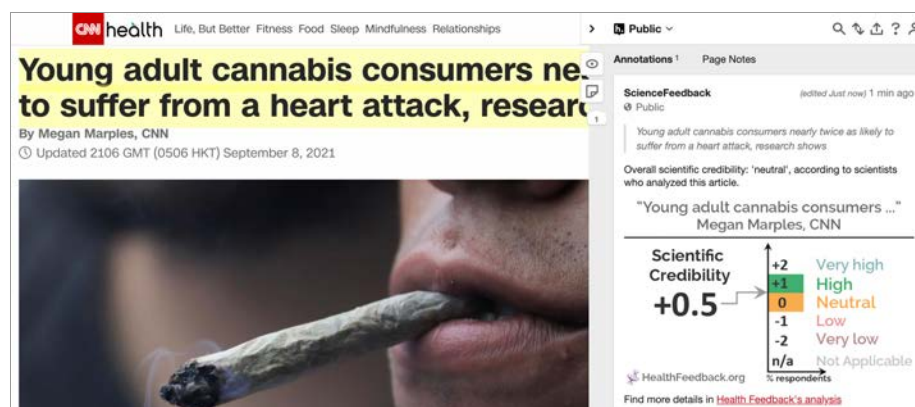

"This article recycles old tropes such as "it's been warm before", "CO₂ levels have been higher in the past" (millions of years ago!), "CO₂ is plant food", "warming..

Latest Article Reviews - HEALTH

CNN article accurately reports an increased risk of heart attack from cannabis use in young people, but lacks context on difference between absolute and relative risk

CNN

"Yes, it's true that the data suggest a "doubling" of risk for cardiac problems in cannabis users, but the article confuses "absolute" risk and "relative" risk. Those..

Washington Times article by Robert Malone and Peter Navarro relies on inaccurate and unsubstantiated claims about virus evolution, vaccine immunity, and COVID-19 vaccine safety

Washington Times

"This article has inaccuracies throughout with a clear view to push an anti-vaccine agenda. The picture depicting a skull with eyes and nose made of coronaviruses in the shape of t..
